PASSION

TECHNAL

By  Hydro

TAKING DESIGN TO NEW HEIGHTS, THE PASSION RANGE IS A NEW EXPRESSION IN LUXURY FITTINGS, WITH EXCLUSIVE MIXES OF FINISHES AND MATERIALS AIMED AT PLEASING EVEN THE MOST DEMANDING USERS. MAKING USE OF SIMPLE GEOMETRIC SHAPES, THIS COLLECTION WORKS AS THE PERFECT COMPLEMENT TO A WIDE RANGE OF ARCHITECTURAL AESTHETICS.

/ MINIMALISM AND MAXIMUM ERGONOMICS

PASSION has been designed to be extremely ergonomic and adaptable, as well as having elegant aesthetics. As a result, the back of the handles is rounded, which provides an excellent grip and has a pleasant feel. This rounded design, along with the straight-line aesthetics at the front, create a uniform model that offers the perfect balance between functionality and maximum slenderness.

/ TEXTURE AND COLOUR

The handles in this collection are made of extruded aluminium, with a lacquered or anodised surface finish, and come in any of the TECHNAL range of colours.

/ A CUSTOMISABLE AND GENUINE AESTHETIC

In addition to a base with multiple colours, corresponding to the TECHNAL colour palette, this collection can be customised with an myriad of different materials to adapt even further to each project, achieving a unique and genuine finish. Among the materials available are wood, stone, brass, bronze, stainless steel and also unique aesthetics such as milled grooves.

Available with standard rosette, rosette with key and door rosette
